

La réactivité et les signaux : démystifions la magie du frontend

Quel framework pour le frontend ?

Qui s'est déjà questionné sur le fonctionnement profond de la réactivité de son framework ?

- 153 - Oui
- 38 - Non

ui = fn(state)

A	B	C
1	Quantité	0
2	Prix unitaire	15
3	Total	0

```
import { computed, effect, signal } from 'alien-signals'      ▷

const quantity = signal(0)
const price = signal(15)

const total = computed(() => quantity() * price())

effect(() => {
  console.log(`Total: ${total()}`)
})

//
```

Total: 0

```
import { computed, effect, signal } from 'alien-signals'      ▷

const quantity = signal(0)
const price = signal(15)

const total = computed(() => quantity() * price())

effect(() => {
  console.log(`Total: ${total()}`)
})

quantity(3)

```

Total: 0
Total: 45
